

INAUGURATION OF TWO LOGISTIC AREAS COVERING 2500M2 (26 000 SQ. FT)

Beck-Crespel has inaugurated two logistic areas covering 2500m² (26 000 sq. ft.). These areas are dedicated to final controls and services : kit assembly, dedicated stocks, blank stocks, special packaging, product weighing and balancing...

These new investments enable Beck-Crespel to meet growing client demands for complete logistic solutions. Inventory and kitting areas can be fully dedicated to clients upon request.

We master all the processes involved in the manufacturing of special bolting thanks to state of the art equipments (30 000 m² / 320 000 sq. ft. workshop area, 350 machine tools including 65 CNC lathes...) :

- Hot forging
- Heat treatments
- CNC machining
- Thread rolling
- Non destructive and destructive controls
- Special processes

These 2 news logistic areas are a new step for Beck-Crespel. We are building the infrastructure necessary to implement services with the same rigour and competitiveness as we do daily for manufacturing.
