

SPLITTING OF BECK-CRESPEL INTO 2 OPERATIONAL UNITS

Proximity, flexibility, service :

2 complete teams have been gathered (sales, engineering, manufacturing, logistics), trained and focussed on their specific market, in order to be nearer to their clients and serve them even better. Whole workshops and offices have been move to create these comprehensive teams and meet these targets.

▪ **Petrochemical Unit :**

- ✓ Refineries, chemical plants, offshore
- ✓ Manufacturers of equipments for the petrochemical industries (pressure vessels, valves, heat exchangers, piping contractors, engineering companies...)
- ✓ Distributors of ASTM or DIN bolting for the petrochemical industries

▪ **Energy & Equipements Unit**

- ✓ Manufacturers of equipments for the power generation (turbines, engines, generators, pumps, valves...)
- ✓ Power stations, power producers companies (hydro, gas, steam, coal, nuclear, wind...)
- ✓ Manufacturers of heavy engineering equipments (cranes, civil engineering, navy, lifting, cement industry, railways...)

Quality and technology :

Beck Crespel clients take advantage of Quality, Research & Development, Purchasing teams which remain centralised. Synergies are tapped at all levels between the 2 new Operational Units. We wish to combine the advantage of our size and the reactivity of the 2 new Units.
